

BHATE & RAJE CONSTRUCTION CO PVT LTD

- **Product Life Cycle:** Design products that are durable, repairable, and recyclable to minimize environmental impact throughout their lifecycle.
- **Responsible Waste Disposal:** Partner with qualified waste management companies to ensure proper disposal or recycling of hazardous and non-hazardous waste.

5. Implementation and Monitoring

- A Sustainability Committee will be established to oversee policy implementation, set goals, and track progress.
- The committee will develop action plans, allocate resources, and ensure compliance with environmental regulations.
- Resource consumption data (energy, water, materials) will be regularly collected and analyzed to identify areas for improvement.

6. Communication and Training

- We will communicate our sustainability goals and progress to employees, stakeholders, and the community.
- We will provide training to employees on sustainable practices relevant to their roles.

7. Continuous Improvement

- We will regularly review and update this policy to reflect changes in regulations, technologies, and best practices.

SUSTAINABLE RESOURCE MANAGEMENT POLICY

1. Introduction

Bhate & Raje Construction Co.Pvt.Ltd recognizes the importance of conserving natural resources and promoting environmental sustainability. This Sustainable Resources Management Policy outlines our commitment to using resources efficiently, minimizing waste, and adopting practices that support the long-term health of the environment.

2. Scope

This policy applies to all activities conducted by Bhate & Raje construction company Pvt.Ltd.

3. Core Principles

- **Reduce:** We will strive to continuously reduce our consumption of resources like energy, water, and raw materials.
- **Reuse:** We will explore opportunities to reuse materials and products whenever possible.
- **Recycle:** We will implement responsible recycling programs to divert waste from landfills.
- **Responsibly Source:** We will prioritize sourcing materials from sustainable and ethical suppliers.
- **Innovation:** We will encourage innovation in processes, products, and services that minimize environmental impact.

4. Key Strategies

- **Energy Efficiency:** Implement energy-saving measures in buildings and facilities (e.g., LED lighting, efficient equipment).
- **Water Conservation:** Reduce water consumption through low-flow fixtures, leak detection and repair, and water-efficient landscaping practices.
- **Material Management:** Minimize waste generation through efficient production processes and responsible material handling. Implement recycling programs for paper, plastic, metal, and other materials.
- **Sustainable Procurement:** Establish criteria for selecting suppliers who prioritize sustainable practices and use recycled or responsibly sourced materials.
